Services

Business Intelligence and Data Warehousing

Let Annams help your business expand markets, increase efficiencies and retain customers.

Business Intelligence and Data Warehousing - Analysts and decision makers in today's dynamic business environment depend on the benefits of strategic information to effectively support their decision-making processes.

Custom Application Development

Custom Application Development - The Annams Application Development & Integration process guides you from the drawing board through to development and integrated deployment of software solutions for your business.

eBusiness Application Development

eBusiness Application Development - Fast changing market conditions can make the cost of developing and managing in-house expertise prohibitive. Annams can help you solve this issue by providing the right resources at the right time to rapidly execute your web strategy. With our knowledge and experience building solutions centered on data and the Internet, Annams can help meet your time sensitive project objectives.

Support

To ensure that your business is operating at its optimal level, easily accessible Support is essential. Annams Consulting will be there for you.

Oracle DBAs - Providing immediate on-site DBA assistance.

Staff Augmentation - Providing high level technical support by supplementing your IT staff with Oracle expertise from Annams. This includes both on- and off-site support.
