Oracle 9i

APPLICATION SERVER

Install and Configure

Oracle9i Application Server is the industry's most complete and integrated application server. All the technology you need to deploy your e-business portals and transactional applications is available in a single product. Let Annams guide you through the possibilities.

9iAS Installation Services

Duration*

- Windows NT/2000: 4 days
- Unix/Linux: 5 days

Cost*

- Windows NT/2000: \$4,800
- Unix/Linux: \$6,000

* Time and cost estimate is based on a machine with no Oracle software previously installed.

Deliverables/Scope

1. Preinstallation

This process includes complying with hardware and software requirements, performing tasks such as setting up the origin database to function with the Oracle9i Application Server, and launching the Oracle Universal Installer.

2. Installation

This process involves the Oracle Universal Installer guiding the users through the installation process as it performs tasks such as gathering user input for the origin database, checking for required disk space for installation, and launching configuration assistants to configure the components.

3. Postinstallation

This process is discussed in the Oracle9i Application Server Installation Guide. It includes information on environment variables, component-specific postinstallation tasks, commands for starting and stopping components, component Web sites, component port numbers, and additional documentation for configuration.
