Oracle 9i

APPLICATION SERVER

Oracle9i Application Server is the industry's most complete and integrated application server. All the technology you need to deploy your e-business portals and transactional applications is available in a single product. Deploy the fastest Java applications on the planet. Turbo-charge your Web sites and save money on Web site infrastructure with integrated caching. Quickly deploy personalized portals, without hiring a team of programmers. Learn about what's hot and what's not on your Web site with built-in business intelligence features. Get all this and more with Oracle9i Application Server. Annams also offers a complete suite of Oracle 9iAS installation and configuration services at a fixed price.

Oracle9iAS delivers all of the technology you need to run a competitive e-Business:

- **Run All Your Web Sites and Internet Applications**

Oracle9iAS delivers the flexibility to deploy all your Web sites and applications. You can build your Web sites using the latest industry-standard application development technologies including Java (with support for the latest J2EE standards), XML and PL/SQL. Oracle Internet Developer Suite tools, such as JDeveloper and Forms Developer, offer rapid development and deployment tightly integrated with Oracle9iAS.

- **Create Personalized Portals**

With Oracle9iAS Portal and its unique portlet technology, you can rapidly create personalized portals that include single sign-on to simplify and secure access to all your web content and applications. Learn more about Annams portal development services.

- **Wireless Enable Portals**

To extend the reach of your Web portal, Oracle9iAS enables you to make information in any database or Internet application available to any connected or wireless device.

- **Accelerate Web Site Performance with Caching**

Oracle9iAS contains hot new caching technology that dramatically increases Web site performance and scalability.

- **Extract Business Intelligence**

With Oracle9iAS you can analyze your web site traffic and deliver built-in reporting and ad-hoc query and analysis functionality to derive business intelligence.

- **Manage and Secure Web Infrastructure**

Oracle9iAS provides an integrated management framework that includes a configuration and administration console, directory and security services.

- **Integrate Your Business**

Oracle9iAS includes a comprehensive set of integration technologies to integrate with trading partners, applications and business processes.

- **Collaborate With Stakeholders**

Oracle9iAS delivers foundation technologies to streamline communication and collaboration with your trading partners, employees and suppliers.
